KOOMPASSIA

Carry the gear, move it from one site to the next, store it... your every day arborist work isn't limited to the pleasure of climbing! Designed especially for you, our KOOMPASSIA bag is both sturdy and practical. Available in two capacities, 60 liters and 80 liters, it adapts to your needs depending on the volume of the gear that is necessary and offers one of the best price/volume ratio on the market. It is a simple, efficient solution for your gear and will help transport it while optimising your field organisation.

GEAR BAG

DESCRIPTION

The KOOMPASSIA was designed to take all you will put it through: quick changes, wet ground, rough terrain, repeated transport etc. Set it upright or open it flat for optimal access to your gear. Both bag bottoms are in reinforced waterproof fabric, they resist abrasion and protect efficiently the content, even on dirty or rough surfaces.

You have many options to carry it, with several practical, ergonomic handles: two large lateral handles to carry it from a car or with someone else, a short, comfortable handle to carry it upright, stow-away shoulder straps with Cobra-type buckles to carry it on your back and a long shoulder sling for quicker transport. The bag adapts to your needs, not the other way around.

Everything inside is designed to organise your gear efficiently: 3 zipped pockets, a large mesh pocket under the flap and a separate helmet pocket with adjustable size - practical to store your helmet away from the rest. There are now 2 contrasting-colour daisy chains to access quickly what you need to have on hand to start your daily work: one red and one yellow, very easily spotted and that you can attach to any corner of the bag.

Add to that lockable zips, a rain cover, a visible emergency card, two outer daisy chains... and you have a robust, functional bag that is absolutely stylish. Available in 60 and 80 litres, the KOOMPASSIA's volume fits your gear and your work. Sturdy, well designed, for arborists' daily work.
