

#SPIDERROPE

# NIGMA 12 MM

Just like our Argiopes, our 100% polyester Nigma climbing ropes provide excellent stability over time and an optimised grip. With one or two Slim splices, it will always be your go-to solution with either mechanical or textile systems.

## CLIMBING ROPE

## DESCRIPTION

The NIGMA is a 12 mm climbing rope.

Like for the ARGIOPE, FTC has chosen bright colours and mixed them within the strands of the cover, so that it is very easy to spot in the tree.

The choice of a 100 % polyester rope has given great results: the diameter is very stable over time, it doesn't swell. Due to its braiding, the rope also is very resistant to abrasion.

FTC also splices the NIGMA with the Slim TECH® splice - that passes through mechanical prusiks like the ZigZag, the SpiderJack etc.

Comes in 20 m (65,6 ft), 30 m (98,4 ft), 40 m (131,2 ft), 50 m (164 ft) and 60 m (196,8 ft). Other lengths available on request.

Can be spliced on one or both ends.

# TECHNICAL INFORMATION

Standard	CE EN 1891 Type A
Weight	105 g/m
MBS	35 kN
Diameter	12 mm - 24 strands
Composition	55.7 % polyester (cover) / 44.3 % polyester (core)
Colour	Moiré-effect blue and orange
Elongation	3.4 %
	No cover-to-core slippage
