

SRT NECK LOOP

Comfortable, compact and ultra light, a very useful accessory for SRT!

ACCESSORY

DESCRIPTION

The neck loop has been created to keep a chest ascender (eg. Croll, Lov2 etc.) in upright position and in tension during SRT climbing.

It is adjustable and elastic, fits easily and perfectly any size.

No need to take the helmet off!

TECHNICAL INFORMATION

Flat elastic band, 25 mm large (0.98 in)

Breathable black side, for the climber's comfort

Band made of polyester/cotton

Plastic adjustment buckle to set it to the required length

With carabiner (80 mm long (3.1 in), 12 kN MBS, no locking system)
