ACCESSORY

COMPACTABLE BAGS FOR THROW GEAR

www.ftc-tree.com

THE MATRIOSAC IS A ROUND, FOLDABLE SET OF BAGS THAT CAN HOLD THROWLINES AND THROWBAGS.

TECHNICAL DATA

- Polyurethane-coated polyester double wall.
- Large bag :
Ø 38 cm (15 in) / 30 cm high (11.8 in) + 5 cm (2 in) for the pocket / 750 g (1.7 lb) / blue.
- Small bag (fits in the large one) :
Ø 35 cm (13.8 in) / 30 cm high (11.8 in) / 450 g (1 lb) / orange.
- Weight of the set: 1.2 kg (2.6 lb).

EACH BAG IS EQUIPPED WITH:

- 2 pockets at the bottom, to store throwbags (with different colours, to better identify the throwbags).
- 1 inner Velcro strap to hold the end of the throwline.
- 1 handle.

ON THE LARGE BAG:

- 1 transport strap. Strong zip.
- 3 outer straps with quick-release buckles to hold the set folded together.
- 1 lid with fabric and solid mesh lid for a perfect ventilation.
- Bottom pocket for extra gear - 5 cm high (2 in).

PERFORMANCES

The original design of the MATRIOSAC is inspired from the Russian Matriochka dolls: two circular bags that fit in each other and can be folded. The bags can hold two sets of throwgear, i.e. 2 throwlines and 4 throwbags. The large version has an added large pocket for accessories (cambium saver, more throwbags, carabiners etc.).

The line is carefully stowed away to avoid twists and knots. Folding the bag holds the throwline flat at the bottom. 3 straps with quick-release buckles hold the bags folded. Once it is open, the MATRIOSAC is stable, held on the ground by the bags and accessories that act as ballast. Its round profile means a lesser wind surface area.

The bottom is reinforced and waterproof - it is therefore stronger and offers the gear a better protection against ground moisture. Each bag can be carried with its handle. Folded, the MATRIOSAC can be hooked and carried with its side handle.
